Diwaker Tripathi

I am a Research Scientist at the University of Washington, specializing in molecular biology and translational cancer research and large-scale bioinformatics analysis. With nearly two decades of experience across academia, biotechnology, and data programs, I bring a strong foundation in organizational leadership, financial oversight, and cross-disciplinary collaboration. My background in program management, project budget planning, grant writing, and scientific coordination aligns with the ASPB's mission to foster integrity, transparency, and excellence in biological research and community engagement.
